

Transactions

Optional Module for EleVia Electronic Invoicing

SEAMLESSLY EDIT BILLING TRANSACTIONS

FLEXIBILITY

Allow authorized project managers to make edit requests directly into the system, or require the requests go through your accounting staff.

INCREASE EFFICIENCY

Easily sort and filter transaction details. Add comments to labor, expense and unit transactions so all users can see the reasons for the modifications. Automatically notify approvers.

TRANSACTION HISTORY

Gain full history of all changes at the transaction level. Each edit is viewable via a built-in history window. See who requested the transaction modification and who approved it.

BOOST BENEFITS

Electronic Invoicing software becomes even more powerful with Transactions. Further speed the invoicing process to shorten the billing cycle and increase cash flow. Track modification trends to help improve profitability and speed the audit process.

“EleVia continually helps us get more out of our Vision software. We’re grateful for the partnership and look forward to what they can do for us in the future.”

–Chris Haferbier, Financial Systems Director, DLR Group
